**A REAL BOOST**

The Kwimbee is a convertible restaurant high chair that fits nearly all car seats on the market. Just snap the seat in and it's safe and secure for the child. The chair can also be a booster seat for older children sitting at the table, eliminating the need for a separate booster. It has a higher seat back for better back support and has an optional tray. The safety strap is replaceable when it wears out. A wide leg base makes it secure and wheels make it easy to move around. Made from 100 per cent recyclable polyethylene.

Kwimbee: 888-956-0610

**BE CREATIVE**

Dip't and Dusted from High Liner comes in four varieties—butterfly shrimp, popcorn shrimp, haddock fillets and calamari rings and tentacles. The Southern-style seasoned flour coating looks like it was prepared from scratch using a blend of spices. The products can be paired with signature dips and dressings and served as appetizers, sandwiches or entrees. Each can be prepared in the oven or deep fryer.

High Liner: 800-387-7422

**FLAMELESS COOKING**

The Glenray induction cooktop, with no open flame, is designed for cooking and maintaining food on buffet lines. It cooks at temperatures from 60°C to 220°C at 15 different power levels. It has a 120 minute timer, small object and material compatibility detector, overheat protection and comes with a stainless steel case. It is lightweight and easy to clean and available in either 1800 or 3500 watt versions.

Tomlinson Industries: 216-587-3400

**EASY FOOD WASTE DISPOSAL**

Greentail Environmental's GohBIO is the first self-contained high-speed aerobic food waste digesting system designed to fit in any food processing facility, commercial kitchen or supermarket. The unit, the size of an upright piano, can process 1,500 pounds of food waste (vegetable, meat, poultry, seafood, dairy and grains) into clean water that can safely go down the drain. The system is connected and ready to go in one hour with just an electrical connection, water and drainage needed for hookups. GohBIO comes in four sizes to handle a range of waste processing volume requirements.

Greentail Environmental: 604-682-8898

**QUICK CLEANING**

Diversey's RTD dispensing system is foolproof dilution control. Flow rates are adjustable for spray bottle, mop bucket and direct spray applications. Connect to a water hose and it is ready to use. 1.5 litre or 5 litre bottles are available. A 1.5 litre bottle of Final Step 512 Sanitizer is available in a ready-to-use format.

Diversey: 800-668-7171

**RECYCLING MADE EASY**

Witt Industries 132-litre SC35 recycling containers come in a variety of colours. The perforated metal container is available with plastic inserts and various lids for the collection of newspapers, plastic, glass or other recyclable products. Manufactured of heavy gauge steel. Available in standard colours or corporate or sports logos laser cut directly into the unit.

Witt Industries: 800-543-7417

**POS CLEANING**

These cleaning cards for Ingenico POS systems remove dust, dirt and oil that build up on the reader's contacts, which prevents complete contact with debit and credit cards. Another wipe is meant for the card reader's chassis, screen and keypad.
